

# Reducing IRRIGATION energy costs

**Is the rising cost of electricity affecting your enterprise?**

Come along to our **Energy Efficiency Information Days** to find out how you can reduce your irrigation costs

Bundaberg Sugar Services, Isis Productivity Limited and the “Energy Efficiency Gains for Australian Irrigators” Project team are hosting two **Energy Efficiency Information Days** for Bundaberg and Isis cane growers.

These will provide farmers with practical ideas and advice on how to reduce the energy costs associated with irrigation.

**Tuesday 11th November:** on-farm pump and irrigation assessments 8.30 am

Graham and Sandra Webb Farm (At Cane Siding), 382 Farnsfield Rd, Childers

**Wednesday 12th November:** information session 9 am to 4 pm

Sugarland Tavern Avoca Room

Topics to be covered over both days include:

- *Pump efficiencies and assessments*
- *Electricity tariffs and which is the best tariff for you?*
- *Efficiency of existing irrigation methods and could they be improved – more tc/ML – more profit/ML?*
- *The impact of pipe size, valves and other constrictions- does this add to pumping cost?*
- *Pump specs – is your pump best suited to today’s needs?*
- *What new technologies are available and will they work on your farm?*
- *Benefit of capital investment vs payback periods for pump and system upgrades*

A **free** morning tea and lunch will be provided on each day.

For more information, or to RSVP, please contact Andrew Jakins (Isis Productivity Ltd) on 0429114588 or Maurie Haines (Bundaberg Sugar Services) on (07) 41512555 email: [secretary@bbifmac.org.au](mailto:secretary@bbifmac.org.au)
